Letter: Greetings,

An estimated 5 million Americans buy prescription medications for their own use from pharmacies outside the U.S. where prices are as much as 80% lower. However, the law (Section 708 of the FDA Safety and Innovation Act of 2012) says that it is now up to you, as Secretary, to decide what action will be taken when these medicines come into the U.S. Will they be allowed safe passage to patients, or will they be sent back or even destroyed? And will patients have the right to easily appeal a government action?

Research has shown that by purchasing from pharmacies with licenses verified by third parties, such as PharmacyChecker.com, Americans receive genuine medication, often made by the same companies that produce them for sale in the U.S. I know you understand the value and safety of buying medicine abroad because, when you were Governor of Kansas, you set up a personal drug importation program to help the residents of Kansas.

Please say that personally imported prescription medications from Canada and other countries with high pharmacy standards should not be sent back, taken away, or destroyed, unless there is clear evidence that the drug is not genuine or is dangerous (such as a controlled substance). And if a medication gets held for some reason, make sure the patient is promptly notified and given the right to easily respond so that appropriate medication may be promptly released and allowed to reach the patient.

I'm counting on you to keep this critical lifeline available.

Mika Sadai	Tucson, AZ	2014-03-25	Forbidding Americans from getting medicines from other countries is a violation of the principles of free market, free trade, personal liberty and freedom of choice. Many drug prices in the U.S. are inflated and unaffordable to many. What a shame! Don't surrender to the greedy drug companies! I am a senior citizen on medicare, part D sucks and does not answer my needs. I am not alone.

Linda Baldwin		2014-03-26	I am an American who lives in France and who is able to purchase prescription drugs for a fraction of what the same exact drugs manufactured by the same pharmaceutical companies as the U.S. People in the U.S. without insurance or with limited coverage cannot begin to pay the ludicrous prices for these drugs. Nowhere else on earth do these drugs cost as much as they do in the U.S. Change the law or deny prescription coverage to our worthless politicians.

With the economical crisis our country is dealing with people can hardly afford to put food on the table much less pay for high priced medication all based on greed. Senior citizens are the ones that suffer the most on fixed income & needing medication for serious medical issues. Not being able to afford medication for a life or death medical issue is inhumane. Taking away the ability to purchase their medications at an affordable price is also inhumane. If the Pharmaceutical companies want to keep the money in the US then they need to lower their prices to the same as other countries. They would still make a profit since the cost of 1 pill is probably between 1 to 5 cents. It's time to say NO to the pharmaceutical greed and think about the patient.

I use Pharmacy Checker religiously and am very mindful of who I deal with safely for my meds. In my personal opinion, I truly believe manufacturers of these drugs and the pharmacies that sell them are buying the US restrictive legislation with their billions. I do not believe the law makers and legislators have my best interest at heart. I have the right to buy global and my medications are my business not yours. Pay some attention to the makers of Fentanyl and the forcing of people to turn to Heroin because of the high price to obtain the prescription drugs. First they promote to doctors who prescribe and get people addicted and then they keep them that way for years because not to take the meds is to bring on withdrawal and horrible sickness. I watch friends go through this and it breaks my heart. Help citizens in the right way and not by restricting access to more affordable drugs.
Antonella Pavese	Brooklyn, NY	2014-03-30	Health costs in the US are among the highest, but this has more to do with lobbyist pressure than with quality of care. Let's put the Heath of US citizens before big pharma interests.

Peter Draganac	Maryville, TN	2014-03-31	I know how much it costs to make many of these drugs, and the prices U.S. companies charge are obscene ... The amount (particularly) for generics is crippling for seniors. Some of these meds are marked up several 100 percent. Can you not see the impact this has on medicare and medicaid (Literally millions or billions of dollars)... Some people literally have to choose between their food or meds !!

Crystal Griffith RN (ret.)	Baker, FL	2014-03-31	I need some medication that is not covered by my Medicare Advantage Plan. It is half the price in Canada compared to pharmacies here. That is a significant savings. Considering that ALL medications sold inside the US are not necessarily manufactured here, it seems hypocritical to say we must buy from within the US. I have never had a problem with any of the medications I've had to import for myself or an elderly friend with a 5th grade education. She simply cannot afford to buy the drugs she needs locally and still have money for food, utilities since she had a major heart attack in 2012. Folks with good insurance usually get all their meds from within the US. It's the poor and elderly that are going to be ripped by forbidding us to get the meds we need at a reasonable price. If the elderly cannot afford to pay for their meds, they're going to end up being hospitalized for non-compliance issues and a worsening of their health. One hospital bill can be very expensive, even at Medicare rates. It's false economy and the big drug companies know it. I saw too many of these patients when I was an ICU nurse. Something as simple as a medication for hypertension can stop a stroke before it happens. Once it happens, then the bills really start piling up. Remember that there is an opposite and equal reaction for every action taken.

Zohreh Sepanloo	Upland, CA	2014-03-31	My insurance does not cover specialty medication. The medication I need is \$3500 per month if I want to buy it from US pharmacies. I get it from Canada on-line for about \$250. If US government wants to control patients on-line access to affordable medication, he better start controlling the pricing of Pharmaceutical not to charge these ridiculous amounts for their medicine.
kenneth leavitt	boca raton, FL	2014-03-31	the prices keep rising at a ridiculous rate. to save money.
Jacque Sherbak	Foley, AL	2014-03-31	Many citizens currently cannot afford health insurance in the USA. That leaves them to pay for prescriptions which are doubled and tripled in price by the very same companies who manufacture and sell that exact same Rx formula under a different name outside the USA. I depended on an internet Canadian pharmacy for three years until I was able to barely afford healthcare in 2014. I have several permanent chronic conditions and won't be Medicare eligible for another 7 years. In short, I may not be able to continue to afford health insurance. USA pharmaceutical companies can and do sell their products outside the USA; but they are prohibited by other countries from charging the prices they are legally allowed to do in the USA. Obviously they still make a healthy profit or they wouldn't sell internationally! Banning my ability to purchase online in Canada is an unconscionable violation of my legal rights and an blaring double standard which keeps the poverty stricken who are ill, just that. (Former BSN, RN)
Stacy Jones	Sanger, CA	2014-03-31	I cant afford the prescription prices of the US. It not only requires me to buy the more expensive prescription, but also requires more doctor visits in order to even get a prescription, and my Dr. visits are \$45.00 each visit, on top of paying insurance. I dont have the money for all that!!! And most others dont either. Taking this away means taking medicine away from people who really do need it. Make a disclosure agreement if necessary, saying that whoever purchases it gets rid of any dispensers responsibility if its used wrong etc. but dont take it away!!!!
Timothy Chagnon	Thomaston, GA	2014-03-31	can't have a love life with out them. and 57 is to young not to have one. you got a right to say safe drugs when all the lawyers that got bad drugs passed by the FDA. give me a break. Jeff Brown	St. Petersburg, FL	2014-03-31	Please don't let the US pharma industry take away our rights as Americans to freely purchase safe, affordable medications from our closest ally and friend, Canada. This a blatant attempt by Big Pharma to protect their already exorbitant profits. Don't them make enough already? If i can't buy from Canada, then I can't afford my medication. Please don't let them take that away from me and from the millions of us that need to buy less expensive medications so that we can stay alive and healthy.

JACK MAYFIELD	GREELEY, CO	2014-03-31	We have been using a Canadian pharmacy for the past five or six years for the purchase of meds that are unaffordable at our local pharmacy. Without the ability to do such would mean we would no longer fill those prescriptions. I guess some ones mental health is less important to the drug companies than the money they may not be getting! Funny isn't it that our country allows the importation of almost everything from other countries because it is cheaper, yet you want to deny me the same rights!

jim fain	Alpharetta, GA	2014-03-31	I can't afford all my medicines buying them at the inflated US cost.
Robin Nelsen	Pacific Grove, CA	2014-03-31	I am disabled and saving money wherever possible is extremely important to me and my family.
Virginia Boyce	Daytona Beach, FL	2014-03-31	I cannot afford my inhalers in the U.S. Buying these from Canada is the only way I can continue to breath.
Susan Coates	Monte Sereno, CA	2014-03-31	This is the only way for some people to be able to afford the medications they need! It must be allowed - medications can run into the hundreds of dollars here. Something has to be done about this hardship on the average or low income wage earner.
Itka Troutman	Show Low, AZ	2014-03-31	My medicine is really expensive here in the U.S. and by getting them through outside the U.S. I can afford to this this much needed medicine
Dorothea Green	Port Saint Lucie, FL	2014-03-31	i would not be able to have my Med at US pricing.Couldn't afford them
Robert Paullin	Cairo, OH	2014-03-31	I live on a fixed income and can't afford to purchase some of the higher priced drugs. These drugs are more affordable when I purchase them from My Canadian Pharmacy
Ronald Lowicki	North Las Vegas, NV	2014-03-31	The price of Prescription drugs are going through the roof and as a senior, The cost may be above what we could afford.
Britt Burkhart	Auburn, WA	2014-03-31	Can not afford the drug in the US
Michael Edwards	Baltimore, MD	2014-03-31	Living on fixed income.
Barbara Flanagan	Long Island City, NY	2014-03-31	Medicare doesn't cover certain of my medications or charges outrageous prices for them. I've been buying from Canadian pharmacies for at least a decade.
Joe Larson	Bloomer, WI	2014-03-31	I pay for my own drugs
Pam Hawthorne	Saratoga, CA	2014-03-31	U.S. patients cannot get most medications at an affordable price, so we need pharmacies outside the U.S. to provide access! Stop the pharmaceutical companies from getting rich off us patients, if you don't want us going elsewhere!
john haggerty	cookeville, TN	2014-03-31	I can't afford US prices
Eugene Smith	Asheville, NC	2014-03-31	U. S drug prices too high
Toni Edwards	Ocala, FL	2014-03-31	I can't afford the USA drug prices. I end up in the "donut hole" in June, so Canada is the only way I can get the medication I need. I buy generics when available, but Spiriva and symbicort are not available.
michael sprague	Mundelein, IL	2014-03-31	We depend on the savings we get by using Canadian sources for our meds!
William Bergman	Keystone, CO	2014-03-31	Why not allow a 90 yr. old former lawyer the right to buy legitimate items where ever in the world he desires?
James Buchanan	Hemet, CA	2014-03-31	My urologist says I need Viagra or Cialis to help with my urinary problems but Medicare will not pay for any of it. I have to use Canadian pharmacies to afford the treatment.
Patricia Trentini	Mesa, AZ	2014-03-31	The price for name brand medication is beyond my pocketbook
JB Schriber	La Verne, CA	2014-03-31	This is important to me because I couldn' afford some of my medications if I was forced to buy them only from the United States [Medicare Part D is a farce].
Patricia Hanley	Cedar Park, TX	2014-03-31	Prices are lower and affordable from reputable Canadian Pharmacies.
Tom Johnson	Parker, AZ	2014-03-31	Need less Gov. in Business

Barbara Giss	Los Angeles, CA	2014-03-31	It is important because medications are way too costly in the U.S. Canada is a savior for so many people. Here drug companies have a monopoly and charge whatever they want.
Pamela Fender	Rohnert Park, CA	2014-03-31	Because it saves me at least half on my medication. The U.S. is only interested in making profits. Lots of profits.
ROBERT MULLEN	ENUMCLAW, WA	2014-03-31	I CAN BARELY AFFORD MY MEDS NOW & LETS FACE IT BUSH'S PRESC. DRUG PLAN MAD MORE BILLIONAIRES THAN ARAB OIL. THE BOB
Harry Thomason	North Augusta, SC	2014-03-31	I have had to buy drugs from Canada in the past, and may have to do so in the future because of the high cost of buying them in the U.S.A>. there is nothing wrong with using a reputable pharmacy in Canada as the drugs are 1/2 to 1/3 cheaper in Canada.
Judith Nace	Sherman Oaks, CA	2014-03-31	Would not be able to afford meds I need for my lung issues, I would not be able to move around the house or venture outside.
Judy Tate	New York, NY	2014-03-31	This is important because my medication does not come in a generic form and my insurance will not pay for brand names. It is unaffordable in the U.S. and it is affordable coming from the U.K. This medicine keeps me alive. If I can't get it, I will die. Do NOT eliminate overseas fulfillment of lower cost medication!
Thomas Humar	Spartanburg, SC	2014-03-31	Affordable medications
Brad Davis	Rio Linda, CA	2014-03-31	Effectively supplements Medicare. When in the doughnut hole, this is a god send and I am in the doughnut hole by mid May. It is absurd that I must subsidize the profits of the pharmaceutical companies by7 paying a premium for living in the US, especially as Big Pharma systematically reduces its research budgets to show lower costs and thus higher profits. Please let me continye to get medication through Canada - that or increase my medicare coverage. Brad Davis, Ph.D.
Robert Hudecek	DeForest, WI	2014-03-31	The only way to effectively control costs is through global competition.
Jacques Bradford	Muskegon, MI	2014-03-31	I could not afford to buy my med's if you stopped me from buying from international pharmacies PLEASE do not stop us.
tommy minor	hampton, VA	2014-03-31	I and friends and family save hundreds of dollars each year by buying from TCDS. I have found that the efficacy of my purchases surpass the experience with US purchased drugs. I paid \$200 for a one month prescription of Nexium from Walmart, the next purchase was TCDS and they charged \$168 for 6 months' supply. There is not only a big difference in price, the Walmart product did not work and they will not give refunds. I have dealt with healthcare most of my life as a plan administrator for a national group (80,000). I have friends who now don't have to worry about choosing between eating and paying for drugs. This is a deal breaker for me and my family and friens. We will not be happy with the party responsible for mucking up our ability to purchase from Canada.
Bert Lerch	Seattle, WA	2014-03-31	For a Senior like me on a limited budget , It is very important to have a choice and be able to purchase Rx for a much lower price. If this choice is eliminated, other countries are going to retaliate and another monopoly is created in the USA.
RICHARD BEYER	JAMESBURG, NJ	2014-03-31	Tired of being ripped off by my own country.

olivia silensky	los angeles, CA	2014-03-31	medication i get from NW pharmacy is \$90 for 3 months if i were to get it in usa it cost over \$200. who can afford?
Martha Noble	Birmingham, AL	2014-03-31	Because I have been able to order generic medicines not available in the US and brand named meds less expensively, I have been able to purchase medications rather than have my asthma go untreated for the past 3 years. When my Mother's insurance put her in the "donut hole". Had it not been for ordering from Canada, she would have been without her meds for 3-1/2 months. As it was, because of the generics, I was able to order 4 months worth of medicines for \$500 rather than the \$500+ per month it would have cost.

Pauline Webb	Midlothian, VA	2014-03-31	Quality received and cost effective over many drugs provided in the United States. The drug companies should not be allowed to dictate who can and cannot obtain drugs through pharmacies outside of the United States. This is a free enterprise country.
Arthur Gerber	Webster, NY	2014-03-31	COST !!!
John Botellio	Spring Hill, FL	2014-03-31	<p>I buy several prescription medications from online pharmacies in Canada and other countries where prices are much lower for the same drugs – often 80% lower! Millions of Americans like me do this safely, buying from regulated pharmacies with verified licenses. But next year these drugs could be seized and destroyed by U.S. Customs without notice. Although the law says that ordering most medications from outside the country is not legal (a law that should be changed), the government has not taken actions against individuals like me who purchase small quantities for personal use. To order safely you just need a valid prescription filled by a licensed pharmacy, and you can't order a controlled substance, like a pain medicine.</p> <p>Drug companies are lobbying the government very hard to take actions that would keep Americans paying inflated prices while they sell the same drugs for much less outside the U.S. Meanwhile, tens of millions of Americans don't fill their prescriptions due to high drug costs.</p>
Emery Kettell	Spanish Fort, AL	2014-03-31	I certainly feel that in many developed countries drug manufacturers are certainly capable of producing pharmaceuticals. The FDA's record of safe drugs on a timely basis with out the questionable judgment of the Federal Government is not perfect by any means. The generic Crestor I get from Canada has actually improved my cholesterol numbers verses brand name. I imagine on a drug like generic lavitra one would know in about a 1/2 hour if it works or not.
Charles Smith	Columbus, GA	2014-03-31	I will be unable to afford life saving medications. Isn't this a from of Genocide

M. Gordon	Sonoma, CA	2014-03-31	Being on a fixed income, and 67 yo, my Plan D doesn't pay for anything except generic drugs. My dr. has recently put me on a new brand drug and the cost is outrageously expensive. If I don't get it from a Canadian pharmacy, I won't be able to afford it. As it is, I'm buying the generic from Canada and it has been extremely powerful and effective. I don't want to have to give it up due to the cost. Please, please, don't cut American's off from access to Canadian pharmacies. This is an example, in my opinion. of how the American Pharmaceutical companies rule the United States' pharmaceutical industry. Plus, why is it that Canada has an affordable generic of some drugs while in this country there is no generic for the same drugs? That's not fair to the American public! Please, Secretary Sibelius, do the right thing for the American public and continue to allow us to access Canadian pharmacies for certain drugs which aren't available to us in the US. Thank you so much.

Jeffrey Saal	Burleson, TX	2014-03-31	Even when I did have coverage for Cialis under my insurance they limited me to 3 pills a month. Any additional pills cost \$25 each. I had this prescribed to me because of prostate cancer and removal surgery. This is for therapy/recovery, not a recreational use drug which I felt insurance companies have a misunderstanding and apathy towards.

Lillian Ostrach	Tempe, AZ	2014-03-31	My health insurance prescription coverage requires me to either take generic medications, to which I am allergic, or pay almost the full cost for the name-brand prescription medications I require. Because of the poor prescription coverage, I have ordered prescription medications from a legitimate Canadian pharmacy for 5+ years and paid a fraction of the price I would have paid in the US. Instead of attempting to stop Americans from purchasing legitimate prescription medications from authorized and vetted Canadian pharmacies, why doesn't America stand up to the pharmaceutical and insurance companies and lower the price of these medications? Until then, I will continue purchasing from Canada when possible.

Carole Copeland	Dallas, TX	2014-03-31	I have Major Depressive Disorder and cannot afford the one medication that works, Wellbutrin, unless I get it from a Canadian pharmacy. My insurance does not cover it. The FDA has pulled many of the generics of this drug as they do not work. I have experienced this and thus went outside of the US to get the brand. It was \$600 a month in the US and \$60 a month from Canada. It works great...I haven't felt this good in a long time. I think the greater question is why the US companies are allowed to charge so much that we are forced to go outside the US. How can the same drug be 80% less in Canada? I trust that the needs of the people of this country and the needs for prescriptions to be affordable is the greater question and that you address the needs of the middle and lower classes of the country for quality drugs. I trust that you continue to make the choice to allow medication from other companies in the US until our prices are more competitive with other nations. Thank you.

Barry Williams	Dallas, TX	2014-03-31	As a Family Physician I have seen too many times patients who had to make a choice between food, rent and life as they could not afford medications. The USA is the only country that charges 2 to 10 times more than other countries for medications. It is a disgrace!
Russell Callahan	Caldwell, NJ	2014-03-31	COST!!

James Sturdivant	Sandusky, OH	2014-03-31	As a 50+ year insulin-dependent diabetic, I spent \$8,800 in 2013 out of pocket for health care in the USA...As a retired teacher, only \$7,200 was paid to STRS for my insurance coverage...While I did not purchase much from Canada, it certainly helped me to keep my costs down...Just as an example, my wife, also a retired teacher, and I spent over \$17,500 (combined) out of pocket...When my son was denied health care insurance for his newly diagnosed Type 1, insulin dependent diabetes at age 29, 3 bottles of needed insulin from Canada was \$115...The US Pharma interceded, and now the same 3 bottles of insulin from Canada costs \$490 USD...God Bless America, but after 72 combined years of serving the public as teachers, we need your help... Kindest regards, James Sturdivant
Charles Fantom	Glendora, CA	2014-03-31	For those that rely on medications and find the cost in the USA to be exorbitant this is the only way to go. Meds or food not good choices
Vincent Schembari	Laurel, MD	2014-03-31	Competitive rates. Longer expiration dates than some online pharmacies in US.
Paula Eilbott	Plano, TX	2014-03-31	People shouldn't have to pay more for their prescriptions just because they live in the US. Thanks to limitless amounts of money the pharmaceutical lobby has contributed on both sides of the aisle, our government refuses to regulate this industry at the expense of everyone in the US who must rely on prescription medication. Other countries protect their citizens by negotiating or regulating lower prices on prescription drugs. A PBS Newshour report said "Prices in the U.S. for brand-name patented drugs are 50 to 60 percent higher than in France and twice as high as in the United Kingdom or Australia". It also reported "A recent survey showed that around one in five U.S. adults did not fill out their prescription or skipped doses because of the costs of medicines in 2013". This is totally unacceptable. The health of people in the US shouldn't be for sale.
Donna Karlsen	Battle Ground, WA	2014-03-31	To help with the cost of COPD meds. The insurance co-pay on some is ridiculous, even if they have been on the market for years.Husband needs to breath!
Carol Parkola	Palm Beach Gardens, FL	2014-03-31	I should have the right to decide where to purchase medical supplies that I need.

Mary Jo Scarlettte	Island Lake, IL	2014-03-31	Having been unable to obtain insurance in the past if I had not been able to get my meds from outside the US I would have had to skip them at times. For people who still may not have good coverage it is still a necessity.
Laurie Stanley	San Pedro, CA	2014-03-31	My son has bipolar disorder and has been prescribed Abilify for 9 years. It is not available here in generic and the cost runs as much as 700.00 for a 30-day supply. He has been out of work (and insurance) for 2 years and our only option to obtain this medication is to order it from a Canadian Pharmacy. When he had insurance we obtained it through a U.S. pharmacy and only had to pay a co-payment. We are not rich. I am a single mother trying to take care of my son and keep him stable.
Leo Mahoney	Edgewater, MD	2014-03-31	So a friend can continue to get his medicine.
John Harris	New London, CT	2014-03-31	Not right that pharmacy companies or the Gov can block affordable options.

Constance Wilcox	Pittsford, VT	2014-04-01	I need to pay out of pocket costs for a brand name drug for a specific treatment that I am on. There is no generic equivalent in the USA but there is a generic available through a Canadian online pharmacy. Purchasing the generic in Canada is significantly less than buying the brand name in the USA.
Lewis Wesson	Summertown, TN	2014-04-01	So I can afford needed medications.!!
Greg Peters	Cumberland, WI	2014-04-01	This is important to me because the U.S Government has removed Colchicine, USP from the US Pharmacopia in place of "Colcrys," which simply does not work, and costs fifty times as much as Cholchicine USP. Colchicine is a drug I have taken for forty years, and one without which I will be unable to walk or function. Stop allowing these renegade drug companies to destroy people's pain relief and peace of mind. RESTORE CHOLCHICINE U.S.P.TO THE U.S. PHARMACOPIA, AND DO NOT INTERFERE WITH MY ABILITY TO GET THIS CRUCIAL DRUG!

Carol Measel	Avon, IN	2014-04-01	I can not afford brand drugs that are not available in the US as generics. Generics by mail allow me to take my medications as ordered rather than skipping doses.
Patricia McGhee	Harlem, GA	2014-04-01	Because the American Pharmacy's are charging so much that the older people that need these medicines, are being held up by the big companies here in America. They are robbing us on all the medicine!!! At least Canada is fair.
Carol Ossi	Mahwah, NJ	2014-04-01	I am dependent on a medicine in Canada that would cost me 5 times the price in the US. If I am unable to continue to receive this medication from Canada. I'd be completely disabled.
Moron McCain	Daingerfield, TX	2014-04-01	We could not afford our medications otherwise

Carolyn Hattrup	Lompoc, CA	2014-04-01	The United States Pharmaceutical company's make so much money and Social Security never is enough to cover the cost of medications. I never want to have to choose between eating dinner and filling a Rx. I won't have to as long as I can continue to get Rx's at a lower cost outside the US.
Michael Hattrup	Lompoc, CA	2014-04-01	The medicine costs so much more in the United States, and it really should not cost that much more than the rest of the world. Thank you for providing a better cost for our medicines.
Ted Bunten	Marco Island, FL	2014-04-01	My online Canadian pharmacy allows me to take all my medications. Direct delivery to my mailbox saves me from driving to a local drugstore and the pricing makes it possible for me to take all my prescribed medications.

Kim Cross	Wichita, KS	2014-04-01	I have COPD and asthma with the prescriptions costing over \$500 per month, with insurance. The ONLY way I can afford these meds is through drug stores outside the US. Since the new healthcare bill would not address the problem of prescription cost, I have no other options for getting life saving medications.
Paul Grebanier	Brooklyn, NY	2014-04-01	Recently, Anafranil generic costs soared to over \$1000 per month in the US. By purchasing from Canada, it's about \$50.
William Grome Jr.	Natick, MA	2014-04-01	Most U.S. medications are so much more expensive than Canadian ones. For seniors, on fixed incomes, this is very important.
Shelley Jordan	Redding, CA	2014-04-01	They should not be able to take our choice away.
Varga Fox	Walla Walla, WA	2014-04-01	My husband and I could not afford our medications through US pharmacies, even with our insurance. Also, we are able to get generic drugs for most of our prescriptions through Northwest Pharmacy, making them even more affordable. These drugs have no generics in the US.
Darren Inman	Bloomsburg, PA	2014-04-01	I currently receive safe medication from overseas the I would not be able to afford locally.
robert schatz	san antonio, TX	2014-04-01	I cannot afford most of my perscription medicine. Most co-payments are so high , I would never get well tring to figure what menicine I need and what medicine i don't need accodring to the amount of money I have available. I don't feel it the government business to determine who I contract with or who I must contract with. Josie Howaniak	Tucson, AZ	2014-04-01	USA drug costs are ridiculous, anti-seizure medication \$2500/mo, same drug in Italy is \$15. Do you see a problem here?
Martha Brooks	Weirsdale, FL	2014-04-01	There are certain drugs that I can't afford to buy in the USA. One was costing me \$197.00 a month. From Canada I get a years prescription for \$144.00. Nobody should have to pay that much more for their medicine. I've told everyone about Northwest Pharmacy. I don't think the Government should have the right to tell us where to buy our medicine. You can buy anything else from outside the country, even our USA cars are made overseas.
donald king	phoenix, AZ	2014-04-01	cannot afford to buy in the u.s.
Mary Jones	Spring, TX	2014-04-01	As a retired individual with an individual high deductible medical insurance policy, i am dependent upon obtaining reasonably priced medication that is NOT available from US suppliers. Without this outlet, i would not be able to afford my medications. Other heathcare costs are rising ridiculously, and the Federal govt is making it all worse not better. Don't cut off the one reasonable solution to my medical care costs and the only one that is not out of control. The US Govt should ensure that Americans have access to such medications.

Veronica Allen	La Porte, IN	2014-04-01	Many medications in US are way too expensive and this gives an alternative that is usually much cheaper.
Suzannah Greve	Palm Harbor, FL	2014-04-01	I have Crohns Disease. I have "full" medical coverage through my employer. With Perscription coverage, the medication that keeps me alive and well (Asacol HD) costs over \$400 a month from U.S. pharmacies. I purchase this same medication for \$79.99 a month from Canada...most of the other countries in the world produce a safe and affordable generic version of this drug. Unfortunately, Werner Chilcot holds a stranglehold on the patent and production of namebrand Asacol HD in the USA. Most recent estimates suggest that a generic version of the medication cannot be produced here until 2021, due to the patent rights of one money hungry pharmaceutical company that has no regard for human life and suffering. Starting this year, hundreds of U.S. Health Insurance companies have removed Asacol HD from their list of covered medication, placing it further out of financial reach for those who cannot afford this expensive drug out of pocket. I am begging you not to sign the death warrant of thousands of your fellow Americans by cutting off their right to import safe and affordable medications from other countries. Price gouging and monopoly when it comes to life saving medication is simply unamerican! Perhaps your time would be better spent enacting a law against that? I am happy to "buy American" if only an affordable alternative to Asacol HD was available in the USA!

It is difficult to find a part time job to fill the gaps. My advair if bought at walmart is over 250.00 per month. When purchased from Canada it is about 100.00 per month. Please don't stop americans from trying to maintain their health the best way they can afford. When I looked in to the new "Obama Care" the insurance cost at my lowst salary was over 300.00 per month. And normal insurance is more. Please help us all.

In other countries, the government has taken over how much can be charged, because the government pays for it. In this country, the government encourages the drug company to charge as much as they want, there's no oversight. In the USA, drug companies are so busy making profits for themselves, they forget that you can't get blood from a stone. Nothing like dishonest manufacturers and government. They go hand in hand. Roger Beard	Taos, NM	2014-04-01	Mrs. Sebelius...I lived in Kansas when you were govenor. I now live in Taos, NM. I am on Social Security and even though I purchase most of my medications locally I have to admit that at times I have purchased some of my RX's from Canada which saved me a lot of money to make my SS check go farther. Due to health issues I am not even able to work part time anymore but did until the age of 68. I have been employeed since I was 13 years old going to school and then to work. I worked 7 days a week for 9 years until I graduated from college. It seems as though more and more choices are being taken away from seniors. Please don't punish us further by banning us from obtaining medications outside of the US. Roger L. Beard

Barbara Divers	Edgewood, NM	2014-04-01	I am a retired veterinarian who has to live on social security plus a few investments. Drug costs are outrageous unless one is enrolled in a drug program which dictates which drugs one can use even if more effective ones with less side effects are available and some effective drugs are not available inside the United States. I am not in a drug program so I need access to medications that are reasonable and effective and access to effective medications that are being blocked in this country by the drug companies. Please allow me to continue to buy effective medications at a reasonable cost from online pharmacies in Canada.

Colleen muscato	Leominster, United States	2014-04-01	I believe we should be able to purchase our medications where we can get the best price even if that is out of the country and in Canada. However they should be provided by a safe source. As of January 1st, 2014 Aetna and GE decided to jake all GE employees and their family purchase from CVS. We can no longer purchase from Walgreens. THE COSTS FTOM WALGREENS TO CVS HAVE DOUBLED. Shouldnt I be allowed to use the drugstore of my choice, not Aetna and GE's choice. Who is making the extra profit, not us the patients.

Virginia Glover	Rockville, MD	2014-04-01	My son was diagnosed as bipolar. 3 meds were prescribed for him- the cost to us, as he was unemployed due to his illness, was more than \$1,200.00 a month. There is no way we could afford that. Thankfully we got his meds from Canada. Since then there has been a generic version of one of the drugs he needs. Who cares about these things? Not the drug companies- and hopefully Secretary Sebelius won't be bullied by them.
Jay Hepler	Carmel, IN	2014-04-01	Without the opportunity to use international pharmacies to buy some of the drugs I need, I would not be able to afford them. Rene Vries	Knoxville, TN	2014-04-02	It is obvious why this is important to me. It is a crime the way the pharmaceutical industry is exploiting the misery of the people that she is supposed to help! And what is hurting all of us most is that the GOVERNMENT is helping this criminal industry to conduct her criminal exploitation. Both, the pharmaceutical industry AND the government are there to HELP the people! However, dumb and blind financial greed has turned both of them into destructive members of our society. The government is turning against its people and therefore, should be overthrown. We need a NEW government that is truly there for US THE PEOPLE, instead of for a few greedy and insatiable capitalists that only have one purpose. To bleed us all dry for their short term gain!!
Barbara Ehler	Fergus Falls, MN	2014-04-02	Medications of same quality and strength are sold outside the US for a fraction of the inflated US price. The pharma industry is out of control with their greed contributing to skyrocketing costs of health care and US medicine quality dropping from #1 in the world to # 37. It is time to let American people get quality medications for an affordable price - be it OUTSIDE of the US.

By using the Canadian pharmacies I can purchase the same medication for 80-90% less that charged by the "Big Pharmaceutical" companies due to their millions spent on lobbyists and payoffs. Yes I do believe they do pay off the government guys who "represent " the American people. This nonsense has to stop NOW!!!!
Ann Archie	Newport Beach, CA	2014-04-02	\$90 vs \$1800 for a 90day supply of the same medication is not capitalism, but robbery. Even generics in Canada are 1/10th the cost of \$US. Finally, generic and brand name drugs are often controlled by 1-2 companies creating a monopoly that creates shortages and lets the price skyrocket. We need the US Government to represent its citizens, NOT the monopolistic drug companies

Barbara Rench	Racine, WI, WI	2014-04-02	Our government has made changes in the law which have impacted my health in a negative way - and in fact been responsible for causing me to be an invalid and even death for some people. (This relates to control of inhaler propellants. I am allergic to many things: among them are talc and lactose. These ingredients are popular "fillers" used by many pill and inhaler manufactures. Government control over medications should not eliminate options for people who need them. Cost is also a huge factor now that Medicare limits the rights of seniors to get inexpensive medications allowed to younger people under the new laws passed by Congress. This controls both the life span of seniors and their quality of life. Options for seniors to purchase medications they are not permitted to get due to the lack of coverage written in to new insurance laws to limit costs is the same thing as allowing the government to decide who lives and who dies. Freedom to seek medical care and medications prescribed by their doctors elsewhere should not be limited by the government. Thank you for listening. Barbara Rench

If the drugs are legal in America then you should be able to purchase them from anywhere you like. Just as we purchase shoes, clothes, etc. from other outside the US, it's the same concept. If we can't buy legal drugs from outside the US then restrict these pharmacies from charging these outrageous prices or help the consumers pay the difference. The US laws are beginning to dictate everything...we don't elect representatives to hurt us. We elect them to help us...Let's start learning something about these people that we elect. tricia Martin	Norfolk, VA	2014-04-03	While I understand not allowing narcotic pain medications to be bought like this, why is it such a big deal for other medications to be bought from Canada? Lots of people here in the US simply cannot afford the expensive medications they need to survive- like blood pressure meds, etc... If they are being bought by people with legitimate prescriptions, why is it a big deal? Is it because the wealthy drug companies here just want to get wealthier by over-inflating prices and having our citizens forced to buy from them? Seems like greed is a motivation here, and not actually caring about people in need.

E C YARTER	MARANA, AZ	2014-04-03	Big Pharma in the U.S. owns too many Congressmen and Senators who write laws to increase profits. Many of us can't afford to stay healthy because of their greed. Give them some competition!
frederick Prohaska	Goodman, WI	2014-04-03	Obamasaid he would fix this medical thing, all he did was hand the problem to a pack of college undergrads who were all far left and gay democrats, had them cobble together a thing based on suggestions and not guidance and then let the insurance big boys review it so they could make changes in their favor, this isnt providing health care its an insurance scam plain and simple, a good example is the extreme greed in sellinh pills for a fortune when they cost 2 or 3 cents to nake

Gisele Sanders	Portland, OR	2014-04-03	Stop Big Pharma from gouging the American people!
Jay Meek	Baltimore, MD	2014-04-03	Why is it important to me? Because I am sick and tired of living in a country where our elected representatives play into the hands of the big pharma companies to make their owners billionaires at the expense of millions' suffering. That;s why. And the incompetent appointees of Obama, including Sebelius , are on their payroll as well. The notion that these drugs are unsafe is stupid and a lie. Its all about keeping the costs and the profits astronomically high. America and Sebelius couldn't care less about the health of Americans or anyone else for that matter. It's makes me sick.
Gaylene Bucher	Grizzly Flats, CA	2014-04-03	I do not believe the American government has done much of anything in the past 5 years to help her own people .Kathleen Sebelius would have been fired in a normal work place environment instead of heading the Health & Human Services making large sums of money and perks the rest of us could only dream of. We have had several friend who bought their medications from Canada due to the crazy cost here in our own country.

theresa hughes	Mahopac, NY	2014-04-03	Because i am against all big corporate conglomerates who are hell bent on doing nothing more than ripping off the average american citizen regardless of whether they can afford it or not they would much rather watch you die because you cant afford your medication at their ridiculously inflated rices when you can get them safely at reasonable prices in other countries i thought they were suppose to be against monopolies in this country guess not i know that if i could get my ulcerative colitis medicine for cheaper than the 600.00 per month price tag they are charging for it elsewhere i would jump at te opportunity to instead of having to suffer not being able to afford it so going without it another thing they do to keep prices higher is to say its only available in brand name no generic available which would reduce the rice significantly
Patty McGrath	Potomac, MD	2014-04-03	Whose pocket is lined by these restrictions? Just follow the money.
Kathy Lillie	Seattle, WA	2014-04-03	I have good prescription coverage but millions still do not. The drug companies are shafting these people in the US charging huge amounts and preventing certain vital drugs from going generic. The only reason to prevent individuals from getting meds from Canada, Mexico, India etc. is to further enrich the vastly wealthy drug companies.
Kevin J. Gosztonyi	Bethlehem, PA	2014-04-03	It points out the state of our health care system that is held hostage to the corporate bottom line. If the same drugs can be had at a much lower price anywhere else only means we Americans are being gouged by American big pharrma . There are places online where you can save 80% with a coupon by only entering a zip code. If this is possible how can there be any justification for the insane prices we are charged. There are to many middlemen involved in the process. They do not add value, they are just legalized skimmers.

Robin Kershen	Rego Park, NY	2014-04-03	This is important to me because my mom cannot afford her medication from U.S. pharmacies who charge so much more for her medications. If they do away with not being able to buy from Canadian pharmacies, it would be a major hardship on our family. Please do not punish Americans who need to buy medications from outside the U.S. or, better yet, implement a law to make it legal, because it really should be legal. Maybe the pharmaceutical companies in the U.S. should lower their prices - but since that won't happen, the U.S. government should not dictate to me where I buy my medication.

Bruce Wade	Shoreline, WA	2014-04-03	It appears the vast majority of medicine dispensed to Americans is either imported or made from imported materials. Why should corporations have rights to import from known safe sources and individuals be denied those rights? Not to mention my imported medicine costs less than 10% of locally dispensed. Big Pharma should get some competition, not protection.

Tom Panowski	Los Lunas, NM	2014-04-03	Being on Medicare and having to take a very expensive inhaler for asthma, I buy a generic version from a Canadian pharmacy. That generic version is not available in the US. I buy the drug for what my Medicare co-pay is for the US version. But the big difference is that I would quickly reach the "doughnut hole" in coverage without being able to buy from Canada. The pharmacy I buy through will not fill an order without a valid prescription from my doctor. He faxes it straight to them.

I wrote my congressmen once and got a form letter back assuring me that this was for safety and she was working with the drug company's to lower the cost. There has been no change in price. George McMullen	Streator, IL	2014-04-03	I can't afford drug prices in the US
Sherrilynn Palladino	Port Hueneme, CA	2014-04-03	Medicine is too expensive in US. I too buy from Canada.
Antoinette LaSpina	Hicksville, NY	2014-04-03	Drug costs in the US are crazy.. There should be price controls on them.. Why should a 90 day supply cost \$1,600 here and imported from Canada it's \$ 490.00 WHY it's made from the same drug company.. Why doesn't our congressman & senator's stand up to these drug companies.. I think because the drug companies have them in their pockets.. Should be ashamed to to have voted on this bill...
Rich Wood	Hamilton, Canada	2014-04-03	There should be access to affordable medicine for all Americans
Sheila Arnold Tomlin	Kingsport, TN	2014-04-03	I can't afford some of my medication if I don't get it from Canada., The meds are 1/4 of the cost!!
larry godbold	Pass Christian, MS	2014-04-03	very shortly I may have to have medications shipped to me from Canada due to a possible shortage of an important drug here in the U.S. If the U.S. runs out of the drug I need I will not be able to live a decent life. The drugs, especially from Canada, would help save many lives here in the lower 48.
Janet Albrecht	Greensboro, NC	2014-04-03	We are being ripped off by our pharma companies! We are subsidizing them and the folks in the other countries who get their meds at a reasonable cost. Also, if you check your prescriptions closely--you will find that many are produced in other countries, selling them to us as a generic. I am an RN, and I do take generics. My Zocor has taken my cholesterol count down 50 points. I have no side-effects.

Toni Slater	Thornton, CO	2014-04-03	I have purchased drugs from an online Canadian pharmacy that shipped from Turkey, UK, and US distributors. The time period: years. The reason: cost was 80% less. The drugs were sealed by the manufacturer in punch cards except those shipped from the US. Feel free to contact me.
John Ayers	Lafayette, LA	2014-04-03	I can't afford my prescribed medications at U.S. prices!
Michael McLaughlin	Lincoln, RI	2014-04-03	My asthma prescriptions are too expensive!
Arden Davis	Gig Harbor, WA	2014-04-03	This important to me to the tune of saving over \$200. per eye prescription that in the US quotes of \$292. whereas from Canada, same prescription, same manufacturer cost me \$26.plus \$10. shipping. Why should American regulations financially persecute Americans needing prescriptions. All I have heard for the last 10 years is the World economy and now you are telling me I cannot participate in it except to take wage cuts to make America more competitive. Get real!
Donald Kershner	Mishawaka, IN	2014-04-03	Because I cannot afford the Bush revamped Part D on medicare. Since I am not as wealthy as our useless politicians, I have to buy where the prices are reasonable.
Cristine Buntin	Lochbuie, CO	2014-04-03	Let me explain what a lot of people are going through right now, including me. WE cannot afford the cost of buying our medication in the United States. So our only choice is buying them elsewhere, mainly Canada. You may never had to go through an experience where you have no money to buy these medication that actually many people depend on to live. Of course you haven't. We have. If I can buy medications that I need at a lower price outside of the US, I'm going to continue to do so. Why should I make a contribution to the pharmaceutical companies here when they only care about profits? At least Canada has something that we have the we need at a much better cost. I'm sick of the government butting into our business. Keep Out of IT. You've never experienced it nor will you. However, more people than you think do count on medications that they need from out of the US. Hey, I'll give you an idea, we'll stop when the pharmaceutical companies drop their prices. Why not go after them instead? Oh, maybe you get a kick back, is that it? I'll bet that you do.
LINDA BIRCHALL	TULSA, OK	2014-04-03	I pay \$500/mo for 4 generic prescriptions that I have to take for a congenital birth defect. While I signed up for OBAMACARE (WE LOVE IT), it was still cheaper to take the higher deductible & pay the RX out-of-pocket. I can get the most expensive RX from Canada for \$75/mo. vs. \$175/mo. that I pay in the US.
Carl Manley	Sandwich, IL	2014-04-03	I am unable to afford my needed prescription drugs from USA suppliers. Without access to outside suppliers, I will not be obtaining the drugs I need.
Brent Handy	Sandy, UT	2014-04-03	Some medications I wouldn't be able to afford otherwise. Also why are generics available to Canada but not US citizens, specifically Celebrex? It's been around for a long time.
RICKY MULLINS	BROOKSVILLE, FL	2014-04-03	I BUY MY MEDS FROM AN INTERNATIONAL PHARMACY. I CANNOT AFFORD TO PAY THE PRICE THAT AMERICAN PHARMACYS CHARGE
Leo Conway	Richardson, TX	2014-04-03	Because of leg cramp issues. I can get Quinine Sulfate in Canada. I use to be able to get it as a generic in the USA but not any longer.
Sherri Davis	MIAMI, FL	2014-04-03	Even with insurance my medication is very expensive If I can't get my meds from Northwest Pharmacy in Canada I would not be able to afford everything I need every month.

Randy Posvar	Tigard, Saint Lucia	2014-04-03	We should not be at the mercy of corporate greed by this insanity. There is absolutely NOTHING wrong with being able to get safe, affordable medicines from across the U.S. borders. It's not the concern of the safety of U.S. citizens, but only the control and scare tactics we as Americans have been accustomed to for so long now. Leave us alone Big Pharma and you'll not notice a dent in your pocket books.....you'll still be able to afford your yachts and month long vacations.

Meg Mullen	Denver, CO	2014-04-03	I purchase many prescriptions from Canada because the US prices are beyond my reach. Many of the brand names for sale in the US are manufactured in Canada and other countries, and are the same products I am purchasing from Canadian pharmacies for 80% less than US prices. Please stop this conspiracy with US drug companies and start making drugs more affordable for normal Americans. DO NOT allow the seizure and destruction of imported mail order drugs!

Amy Stevens	Pensacola, FL	2014-04-03	I pay \$102.00 for 180 pills (generic) over the boarder, for a drug that would cost me \$570.00 in the states b/c it is still brand name, and was recently extend to remain brand name in the states. If I can not have this drug available from over the boarders, I will no longer be able to walk, care for myself or live a quality life; I would have to literally quit work and I am currently a nurse who cares for others and it's all b/c I have this drug available to me.

Laura Powell	Tuscaloosa, AL	2014-04-03	My insurance does not cover my medication since there is not a generic made yet. I can buy my drugs from Canada for 166.00 for a 3 month supply an and in the U. S. a 3 months supply would cost 750.00. I can not afford this on S. S. and my retirement checks.

Karl Waters	Verona, WI	2014-04-03	I get my drugs for \$1.02 and in the US it costs me \$33.53 apiece. They are needed for me to keep living. Richard Fried	sugar loaf, NY	2014-04-03	Am nye registered pharmacists. Have seen the state approval supposedly at risk manufactures when it suits there purpose
kathryn moore	manhattan, KS	2014-04-03	As long as we do not, as a society, make prescription drugs available to the citizenry at the kind of reasonable costs available elsewhere, we have no business stopping people from going elsewhere. Basically, put up or shut up.
Betty Sanders	Fairfax, SC	2014-04-03	I am 87 years old. The idea of US citizens being "penalized" just because they are US citizens is awful. All of the men in my family who fought in WWII were not fighting to create a country where it is a negative to be a US citizen. Congress should be ashamed. The delaying of generics is also wrong.
Robert M Cohen MD	Philadelphia, PA	2014-04-03	I do NOT begrudge the pharmaceutical industry REASONABLE profits. Those are what pays for R&D. HOWEVER - the profits being demanded by our drug companies are SO obnoxious and out or the range of reasonable that most Americans can no longer afford many drugs they need. The ONLY solution right now is getting the same drugs from first rate Canadian pharmacies. I encourage whatever it takes to not stop this reasonable drug stream.

lillian maynard	Jackson, OH	2014-04-03	A lot of Americans can not afford the prices here. The only reason the drug company's are trying to stop this is because it's taking money out of their pockets. Instead of stopping people from buying in Canada why don't the drug companies compete or shut up and quit robbing the American people. Just another way of taking people's rights. Shame on the drug companies and congress. Next they will try and tell people how many times you can go to the bathroom. It just never stops.

Lynn Harrington	Redway, CA	2014-04-04	<p>In the past I could not afford antibiotics which I needed to resolve an infection. My insurance would not pay for any effective antibiotics- only cheaper antibiotics which were not effective and so my doctor told me her hands were tied- she could not treat me. This was more than systemic neglect, it was dangerous and added to the problems of antibiotic resistance. I was able to import the medication and take it and the infection was resolved. I believe many people are in this situation, not just with antibiotics but also expensive heart medications etc. For instance if someone does not have the right heart medications they may not be able to function very well, but will live a long time. I don't believe this is followed or researched very much.... but it's apparent to anyone who has had a chronic condition.</p> <p>Sometimes it saves money to treat a disease or condition right the first time. Otherwise the system ends up paying much much more for the maintenance of sick people. Until the system is fixed (probably never) it is both cost effective and humane to allow people to obtain the medications they need. And to allow people to buy their drugs at a cheaper price. If they do buy at a cheaper price the government saves money by not having to buy the drugs, and by not having to support as many sick people. It's a win/win situation and a no brainer for everyone except the pharma companies.</p>

Linda Jones	Aurora, NE	2014-04-04	My insurance doesn't cover the cost of my medications that are essential for my very life. The only way we can afford to pay for them out of our own pocket is to buy them from an international pharmacy.
Catherine Hoyt	Windsoe, VT	2014-04-04	Because bankruptcy shouldn't be the result of buying overpriced prescription medications just to satisfy unconscionable greed.
Deborah Sjoberg	Gadsden, AL	2014-04-04	Although I have Part D, which I detest, I feel it necessary to buy my most expensive medication from a Canadian Pharmacy to avoid the coverage gap as long as possible. I would have to do without my arthritis medication if this insane "law" is instituted. Since it is this administration, however, I am betting this entire thing is an exercise in futility.
E Pummill	Littleton, CO	2014-04-04	I don't know how I would afford one of my prescriptions if I couldn't get it from Canada.

Lynn Calhoun	Tiger, GA	2014-04-04	Why should I pay more with my insurance for a medication when I can get it from outside the US for a cheaper price than my copay? It's certainly no secret most of our generic drugs sold in the US are from foreign sources. Another example of big business, here drug manufacturers, trying to hold on to top dollar, no regard for those of us who need and depend on cheaper equally good foreign purchased drugs, and in some cases the brand name.
Kevin Murphy	Abbottstown, PA	2014-04-04	Because this is just one more freedom that is trying to be taking away from the people. Also it offends me that big drug companies in this country control our government
Marshall Brumbaugh	Garrett, IN	2014-04-04	My insurance is high deductible. I pay \$50 for an asthma inhaler from Canada that costs me \$300 in the US. That's a monthly cost.
Brock Bunnell	Orlando, FL	2014-04-04	I need insulin that cost \$270 per 10/ml at local pharmacy. I get it out of country for \$90. The drugs are only made in Germany so there buying local cost me 3x for the same drug. America drug companies are a rip off.
Richard O'Keefe	Chardon, OH	2014-04-04	We can't afford these same drugs from US pharmacies
Eric Weinberger	Asheville, NC	2014-04-04	I have asthma and need a drug that is called Symbicort in the U.S. I simply cannot afford the American price of this medication. If I cannot get the drug from abroad, I will not get it at all. I will then become unproductive, because I won't be able to breathe properly. Although I have been living in the U.S. for twenty years, I am considering returning to my home country of England, just to get affordable healthcare. There I could get my medication free of charge. By the way, the versions of Symbicort that I get from abroad are better than the samples I have been given here.
PAUL ROBERTS	RUBY, NY	2014-04-04	I cannot afford to pay the prices that US drug compamys charge for medicine to keep me alive . The US cost is 10 times more than I pay for the same branded medicine .
PAUL ERNST	RACINE, WI	2014-04-04	The outrageous pricing of my medication in the US Big Pharma is ridiculous...How do they expect me to pay the copays on the meds I need to survive!!!!!!!!
Lisa Cummings	Las Vegas, NV	2014-04-04	I can't afford my copd inhaler. \$120.00 here in the U.S.A. No body can afford these prices.
Sue Vasko	Oxford, MI	2014-04-04	Allows me to afford my medications.
Debora Reyes	Hoffman Estates, IL	2014-04-04	It's unfortunate the drug companies causes such financial hardship on Americans. We should have other alternatives to purchase the medications we need.
Neil Rosenblum	Aventura, FL	2014-04-04	The government is slowly destroying the middle class. After 15 years of purchasing medications from overseas without any ill effects, The Big Drug Companies are trying to rid us of big savings on our prescriptions. It's time for the FDA to get out of bed thig Big Business.
Brandon Shane Butler	Mustang, OK	2014-04-04	My son and I both have asthma and require Advair to control it. If I was unable to buy a generic form from Canada it would cost us an additional \$500/month that I can not afford!

velma alleckson	canby, MN	2014-04-04	My husband is in the nursing home. Costs are extremely high. It's hard to make ends meet. And he needs his medicine.
Phyllis Knubel	York, SC	2014-04-04	I price of the drugs I take is unaffordable. The only way to stay out of the "donut hole" is to buy from Canada. A 90-day supply of LANTUS Solostar for diabetes is about \$800+.
John Hasselbeck	Lawerenceburg, IN	2014-04-04	I have a prescription that to have filled in the U.S. would cost me double the dollar amount that I can have filled at an online pharmacy. The average person and the elderly cannot afford to have some meds filled in the states. So I say tell the big pharmaceutical companies to put on their big boy panties, stop crying because they are not making money (because they charge way to much) and stay the heck out of it. All they want the money for is to pay their CEO's millions of dollars. Enough is enough.
Irene Masiello	Corona,, NY	2014-04-04	I cannot afford the medication I need in order to function so I purchase a 3 month supply from a Canadian Pharmacy that costs me about \$30 a month, if I buy it in my local drug store it costs about \$250 a month
Diane Strickland	Groton, VT	2014-04-04	As someone who nearly went bankrupt buying brand name medications, because I was allergic to most generics, finding alternative sources, AT AFFORDABLE PRICES, in Canada (the identical brands), has saved my life. If the US Government wants to pass this law, then they should make all medications affordable or free to ALL, as the governments of most other countries do. We in the US end up paying for all the advertising, R&D, etc. for the pharmacological companies. I'm sure those in the government don't have to worry about getting these same drugs affordably, so why should we? Passing this law will only make the US a LESS healthy country - not more, because people won't be able to afford to take their medications. There is absolutely no logic in this except for pressure from the greedy big pharma and their kickbacks.
Margaret Hall	Nokesville, VA	2014-04-04	My husband is in the donut hole by April, his meds would cost over \$1,500 per month out of pocket from May 01 until the end of the year. He's been taking chances by cutting his medication in 1/2 or not taking it at all for 1 of the doses. This is dangerous. Now I'm experiencing health issues and having meds added it seems monthly. We cannot afford it anymore. It's either meds or food. Please help us. Margaret Hall

Denise Edwards	Spring, TX	2014-04-04	My husband and I own our own mom-pop business, and health insurance has always been an issue. We have a son who has mental health issues. Even when we had health insurance, his prescriptions were not fully covered. When we had to give up our health insurance, we were left to funding his prescriptions ourselves. The ONLY way we could afford to keep him medicated is through international pharmacies. For some of us this is a "freedom" issue, but for our family, this has been a NECESSITY. BTW, you need to know ObamaCare is a JOKE. I have attempted about a dozen times to get my son signed up for Medicaid and thanks to a CRAPPY website STILL can't get it done. I also shopped for insurance for my family, and the premiums are MORE than what I was paying for before we gave up coverage! It's a SHAM and a SHAME.

He speaks of "affordable healthcare" deceptively, since it does not always offer affordable drugs that millions are on. Sebelius is his puppet so she will do what he tells her no matter how many petitions you get. The only up side is that if people start dying because they cant afford their medications, it will cast another shadow on the ACA.

Hugh Peach	Beaverton, OR	2014-04-04	The government has colluded with the drug companies to artificially raise the price of drugs based on the fiction that they need the extra money to fund research. This research would be easily done more responsibly and at a fraction of the cost by government labs and their consultants. The concept that medicine coming in from Europe or Canada is less tested or less safe than what is often the same product manufactured by another branch of the same company in the US is absurd on its face and puts the government in the position of committing complete disaster against ordinary Americans who need access to medicine at the kinds of prices paid in every other country.

Alison Loerke	Seattle, WA	2014-04-05	The cost of healthcare in America is so over the top compared to most other western countries. Its time to acknowledge the pain that comes with not being able to afford medicines that would help citizens regain their health. Putting a high price tag on that is immoral. Let us purchase medicines where we can afford them!
Marvin Lewin MD	Bradenton, FL	2014-04-05	White house made a deal to extend name brand patents and there was an across the board 300% increase in pricesfor brand name meds.. Patients buying name legitimate brands from Canada made in band companies factories in :acceptable companies with and without a pill cutter can reduce their brand name medication cost frequently by 75%.frequently by 75%. Now that truly makes for Affordable Medical Care

Sandi White	The Plains, OH	2014-04-05	While I've not gotten any prescriptions filled outside of the US, I find the cost of some medications appalling. I have asthma. The steroid inhalers cost no less than \$200/month. Yet I can get 90 pa4in pills at a time for a copay of \$4. I'm not sure the answer is to keep us from getting meds from outside the US, but something needs to be done to regulate these companies - especially when there is no alternative, as is the case with the steroid inhalers. I guess breathing isn't necessary?
T Kindle	Indianapolis, IN	2014-04-05	If it's a regulated pharmacy and one has a valid prescription, I simply cannot see the harm to Americans that use Canadian pharmacies. Who benefits from stopping the purchase of prescriptions from Canadian? Pharmaceutical Companies. Plain & simple. And they already get too much money from us.

To think that some forego medical treatment or prescribed medication, because they cannot afford it, is unacceptable in our great nation. If the same medications are cheaper elsewhere, why block access?

Chuck Thompson	Gloucester Courthouse, VA	2014-04-05	It can easily be verified that drugs sold within the US are sold outside the US at much lower costs. As long as safety measures are taken to ensure that the medications ordered are the same as sold in the US, there should be no issue with getting the same medications at much lower prices. Jacquelyn Bohner	Holbrook, AZ	2014-04-05	The American Pharmaceutical industry over charges US citizens, yet sells the same medications to other countries for less. US citizens should be able to buy medicines at the most affordable price from other countries. This is an example of a free market system, that the US supposedly supports, using competition to keep costs down. One of the areas that US healthcare has escalating costs that is hurting individuals and the whole economy is in the Pharmaceutical industry. Keep costs down by making it possible to buy medications at the lowest cost, without borders.

If U.S. citizens can save by buying from countries with reasonable restrictions on the cost of prescription drugs, we should be able to do so. Further, the U.S. should seriously consider imposing the same kinds of ceilings on the cost of prescriptions that exist in Canada, and other progressive countries.

Alan Sigler	West Chester, OH	2014-04-06	In general I feel that the American Medical Association, etc. are becoming a monopoly with too much power over controlling the supply & demand side of the market, such that it is no longer a "free market". Things such as Medical School admittances are also highly controlled and restricted to keep the number of graduating doctors low, and salaries high. This strikes me as another instance. As for the "risk" associated with buying from other countries I think we need to find a way to allow open competition and allow for those choices where the risk is reasonable.

Al Klein	Fayetteville, NC	2014-04-06	Between me and my wife, we take about 16 prescribed meds a day. And with the donut hole, it can become a matter of eating or medicating. Paying a few hundred dollars a month for ONE med that you need to stay alive, when you can buy exactly the same medication for a few dollars without any insurance, is something that should be happening in some third-world dictatorship and the US should be fighting it, it's not something US should be doing to its own citizens - just to enrich the drug companies. (It's not to pay for research costs - if they can sell a pill to a Canadian pharmacy for 50 cents, and an American pharmacy for \$50, it's greed.)

Judith Macdonald	Braintree, VT	2014-04-06	Some drugs are overpriced!! Competition is good and Canada sure can compete. Americans should be able to choose who they get their medicine from inside and outside the US.
Kristine Franklin	Lake St Louis, MO	2014-04-06	This will law would only hurt low income citizens.
David Campbell	Park Forest, IL	2014-04-06	Now that the Affordable Health Care Act is established, this is even more important because the cost of prescription drugs is distributed among all taxpayers. We will all bear this burden together, but still it is a burden we don't actually need to bear. We can't continue to let pharmaceutical companies profit at our expense while using our own laws to maintain their power.

Erna Berghuys Dryer	Mount Vernon, WA	2014-04-06	My mom's only way to get prescriptions. You cannot take it away from her unless we get Universal Health care!!!! It is time to stop Big Pharma. We are the one of most expensive country in the world for healthcare. We one of the worst out come.... Stop health care for profit!!!!
Dar Rodriguez	Benson, AZ	2014-04-06	We should all be able to buy medicines at a lower cost.
James R. Kennedy. Sr.	Huntsville, AL	2014-04-06	Insurance costs are going up, MDs are retiring early, students will choose to not be MDs, drug costs are higher in US. I never thought I would see the day when US medical care was second class and getting worse.
Roxanne mcaffrey	Stockbridge, MA	2014-04-06	I do not take prescription meds myself, but friends and family do. This may help bring down the prices charged in the U.S. by instituting "free market competition". Drug companies need to have their strangle hold on American health care removed.

Deborah Schwartz	NYC, NY	2014-04-06	If Big Pharma continues to use US taxpayer to aid in defraying the cost of developing new drugs and provides same to other nations at a lower cost. Why should US citizens not utilize those very same drugs at a lower cost from another country? Do not prevent US citizens from obtaining the same drugs from other countries.
Lenore Humphrey	Petersburgh, NY	2014-04-06	My husband and I got our meds from Canada for years until his co. changed health insurers and they wouldn't allow us to do it any longer. I thought it humorous that often the drugs were made in the U.S., shipped to Canada, then bought here cheaper than we could buy them direct.
Joan Anderson	Lafayette, LA	2014-04-06	Like many others, I would be unable to afford needed RX drugs if this bill is passed.

Mark Kessans	New Albany, IN	2014-04-06	It is ridiculous that U.S. citizens should pay substantially more than the rest of the world for medications. The pharmaceutical companies are ripping the U.S. off, because congress allows it in order for members to receive huge campaign contributions, in turn to protect these companies rather than their constituents..

I mean this is the America's mantra a free open market to foster competition.
Gary Lynde	Marlborough, MA	2014-04-06	The cost at my local pharmacy is over double for the same drug . this is not reasonable or fair .
Nathan Chubb	Kutztown, PA	2014-04-06	The US is the only western nation where one can go bankrupt due to medical costs. That is nothing short of absolutely shameful. Buying prescriptions from online pharmacies in Canada should not be an issue, especially if they're fully licensed. We still live in a bad economy, and even though there has been some growth, most US citizens would be hard-pressed to see it. If people can save money by purchasing their prescriptions from Canada, and those pharmacies are licensed and regulated, they should be allowed to do so.

Faylene Roth	Castle Valley, UT	2014-04-06	We have to find ways to cut medical costs. You tell me: how can Canada sell the same drugs for so much less than in the U.S. Do they have a different value system than we do. robert hadden	cincinnati, OH	2014-04-06	Buying a prescription at the pharmacy is like buying on the commodity exchange--instead of buying gold ,wheat or soybeans, we are buying "prescriptions". I had one prescription go from \$112 to \$118 to \$199 then dropped by my provider (with only "a tier 3" vs a "tier 4" prescription available to me) My prescription for an asthma problem cost more that I pay my doctor-- and his professional recommendations to help me with a prescription are completely over looked by the "Big Pharm" corporate "bonus driven" monopoly. A Canadian remedy will be 1/4 th of what I pay in the US ! Last year Walgreens tried to curb the profit excesses of the US "Big Pharm" corporations and even they were unable to make any headway to reducing the costs of prescriptions in the US. Given this ,Canada is our only answer to get what the rest of the world pays for subscriptions that our doctors recommend. The answer to this problem is government oversight of Big Pharm costs and profits or a government prescription exchange--if this doesn't happen its either we bankrupt our seniors and those with special med needs or we buy in Canada.

Gina Remer	Minneapolis, MN	2014-04-06	I'm an RN & a Public Health Nurse that believes patients, families & myself should have the opportunity to decide for themselves where they fill their prescriptions. If another country, like Canada, has their prescription at a lower cost & is the exact equivalent & efficacy of the medication they take here in the U.S.- then why not? Not everyone has the luxury of affording their prescriptions & that may mean the difference between taking their meds or putting food on their table or paying their electric bill!
Irene Moye	Lexington, SC	2014-04-07	It is no secret that Americans pay inflated rates for prescription drugs. Often even "discounted" rates are many times higher than what people in other countries pay, even when we are covered by medical insurance. Robert Korb	San Jua, Puerto Rico	2014-04-07	American Pharmaceuticals routinely overcharge for medicines people rely on to maintain their lives while the same medicines are available in other countries at much lower prices due to their ability to negotiate drug prices - unlike in the U.S. where pharmaceuticals appear to have a stranglehold on the political system that prevents us from setting restrictions on overcharges. Until the U.S. solves it's problem with overpriced drugs, middle class people relying on expensive medicines must do everything they can to keep their costs down to avoid the sometimes crushing costs of medicine. Online Canadian pharmacies are providing a critical stop-gap service which helps those who have insufficient insurance coverage and high costs of medicine, maintain themselves in the face of excessive drug pricing. Closing this option flies in the face of Obamacare's stated goal of preventing people from resorting to bankruptcy resulting from excessive medical costs. The high cost of medical care is not ONLY from medical services - it must include pharmaceuticals in order to be effective. With respect to drug pricing it seems the Affordable Care act as it stands now, and likely in the future cannot achieve that goal. Leave the ability to purchase from other countries alone please. We need alternatives in case we cannot afford the medicines we need to maintain normal lives.
Joe Compian	La Marque, TX	2014-04-07	Having the ability to purchase medicines from a legitimate on line pharmacy is crucial when I reach my doughnut hole.
Angie Pennacchini	West Warwick, RI	2014-04-07	The drugs from other Countries are much more affordable, the elderly have and ill have much to contend with, especially in co-pays, etc. The drug companies in the USA are upset because it is "less" money in their pockets. Kathleen Sebelius, should be really consider the people who are struggling to pay for an already over priced medicine that they really need. It is the drug companies and pharmacies in our Country that continue to raise prices. These are the issues that should be addressed. If drugs cost less in the US, this would not be an issue, would it ?

Marcus Weise	Woodland Hills, CA	2014-04-07	Even with insurance, the medications are very very high in price, some aren't covered and some generics are not sold in the U.S. It is actually less expensive to pay out of pocket from a pharmacy outside the country than to use insurance and pay in the U.S. It is also wrong to be told that a generic is not available in the U.S. when everywhere else the generic is available at one tenth the price or less. Here is another case of where pharmaceutical and insurance companies want to hold Americans hostage.

Linda Davis	Alpharetta, GA	2014-04-08	I order a medication from a reputable online Canadian pharmacy and have done so for approximately 8 years. I have had no problems whatsoever in this time. I totally trust this pharmacy in their vetting practices and in the quality of the medications I receive through them. If I weren't able to get this particular medication in this way, I would not be able to afford it. It is an affordable/viable alternative to surgery I do not want to have unless I am absolutely forced to do so.

My experience with Canadian pharmacies, and in particular, NorthWest Pharmacy leads me to recognize that thet ethically dispense pharmaceutical equivalents at a fair price - one that most can afford. Nothing should bar American citizens from being able to purchase from other sources. It's important.

Robert Beckett	Powder Springs, GA	2014-04-08	I am a low income single father. Even under the affordable care act, the prescriptions I require to keep me alive are not covered or if they are covered, they only pay a fraction of the cost to get them filled in the United States. I can either order my prescriptions from overseas and live or not get my prescriptions and die. I and my children choose that I live and with that said I need to order my prescriptions from overseas to be able to afford them. An example is one of my prescriptions that is shrinking the tumor under my brain stem cost over \$35.00 per pill here in the United States and none of the health plans on the affordable care act covers this medication. But I can order the pills from overseas at a cost of \$4.00 to \$7.00 each based on how many I buy. This huge difference is ridiculous and shows how the American Drug Companies are ripping the American people off. So please do not listen to Big Pharm money but to the people who live or die without their medications in this country. You should be the advocate of the little people in this country (which President Obama claims he is for the little people) and not the big Drug companies and their lobbyist and special interest groups whose only goal is to line their own pockets. Thank you for taking the time to read my story and your help will be appreciated greatly!

Please do the right thing and allow Americans who can not afford ridiculously high prices in this country to continue to buy needed prescriptions from licensed online pharmacies that are Pharmacy-Checker approved. Unless they are permitted to purchase from Canada and other countries, some people will end up going without needed prescriptions because they can't pay US inflated prices.
daniel pompeii	unionville, CT	2014-04-08	The outrageously high cost of prescription drugs in America is one of the things that is driving our health care system into bankruptcy and is especially burdensome on our senior citizens. It is a criminal activity that has been perpetrated by the pharmaceutical Industry and supported by the FDA as well as the members of our Senate and Congress. All of this is allowed to exist thanks to the Medicare Modernization Act that was passed in 2003, which enabled the Pharmaceutical Industry to charge full retail price for drugs that were paid for with taxpayer dollars. This act also prohibits the Federal Government from negotiating lower prices on prescription drugs. Sadly, this will continue under Obama Care. The subject of this petition is an extension of the Medicare Modernization Act and we must stop this madness now. It is time for all Americans to put pressure on the Senate and Congress to repeal this criminal act instead of protecting Pharmaceutical Industry profits.

Rex Voorhees	Hiltom Head Island, SC	2014-04-09	Need to be able to get cheaper prescriptions than you can get in the USA.
William Galley	Clovis, CA	2014-04-09	This is the only way I can afford my medicines.
Debbie Callahan	Port Orange, FL	2014-04-09	My insurance doesn't cover this makes my medicine more affordable
Karen Raddatz	Brainerd, MN	2014-04-09	the meds I now take after the insurance pays still run over \$500.00 per month..breks the bank in a hurry
Bob Winter	Sandston, VA	2014-04-09	We should have the freedom to buy prescription drug anywhere.
Victoria Ward	Denver, CO	2014-04-09	I can not afford the \$300/mo that they charge for my anti-depressant. It is only through the pharmacy in Canada that I use, that I am able to afford my medication. Without being able to utilize my online pharmacy, my mental health would suffer and thus so would my family and friends.

F and V Kidd	Lamesa, TX	2014-04-09	Cost of my med in US.
Hank Miller Sr.	Chappaqua, NY	2014-04-09	This is supposed to be a free country. Nanny isn't needed in this case.
Robert Kiel	Boca Raton, FL	2014-04-09	Because I, and almost all of my disabled clients, are struggling with medical costs and cannot buy necessary medications at inflated US prices. And Medicare should be allowed to negotiate with Pharm. for better pricing! Take care of citizens and worker, NOT corporate profits
Joan Kramer	sun City Center, FL	2014-04-09	Certain drugs are too outrageously expensive in USA. We the people of the US should have to right to choose where we buy our medications.
Richard Licht	Knoxville, TN	2014-04-09	I take Actos for my diabetes. If I buy it from my Walgreen's it costs over \$900 for a 90 day supply. If I buy generic Actos from Canada, it costs about \$60.00. That's not the worst part. If I buy the Actos from Walgreen's I very quickly get into the Medicare donut hle which makes all my prescriptions extraordinarily expensive. Please let me keep buying safe and effective prescription drugs from Canada.
Roger Cornwall	Alamo, CA	2014-04-09	I buy my personal meds from Northwest Pharmacy in Canada
emmons sebenius	san marino, CA	2014-04-09	Should be able to choose to buy cheaper medications anywhere
Charles Payne	Dallas, GA	2014-04-09	reasonable drugs and often hard to find drugs at a good price.
Luis Romero	El Paso, TX	2014-04-09	I buy my prescription medicine from Canada. I've been using the same medicine for over a decade and suffered the side effects of "confused thoughts" from time to time just like the prescription warning says might happen. I'm a Police Officer and this affected my skills when writing reports that should come natural to me. A few months after I started using the Canadian pharmacy Rx, my thoughts started clearing up. Since then I've not had those "confused thoughts" and can now teach others about report writing instead of having to ask someone to remind me how to do the report. That's just ONE reason I'd prefer to continue with the Canadian pharmacy.
Willis Lam	Hilo, HI	2014-04-09	Can help people who get low income and health insurance does not cover some kind of medicine even the Dr. signed prescription.
samuel rizzitelli	stratford, CT	2014-04-09	Canadian pharmacies give low income people the chance to buy rx at reasonable cost
Luke Heckenkamp	Wakesha, WI	2014-04-09	I am signing my name in support of this petition. I buy prescriptions out of this country. Is necessary for me maintain a quality of life and survive on the OOP costs associated with my medications for my preexisting conditions.
Pierre DeMers	Healy, AK	2014-04-09	I need access to the less expensive drugs outside the US.
Horst Rudrich	Redlands, CA	2014-04-09	I am a family practice physician and see that drug costs have gone out of control in this country making access difficult. Our pharmaceutical/medical history is broken and needs to be fixed
R. M. Amick	Clarkston, WA	2014-04-09	Without Canadian pharmacy drugs, we will die. We've no other way to afford life-sustaining medication.l
Lowell Templeton	Culloden, WV	2014-04-09	Can't afford us pharmacies prices
Kelly Fought	Gibsonburg, OH	2014-04-09	I need expensive medication for migraine headaches, and the prices in the U.S. are ridiculous even with insurance.
LEARETTA PARRETT	MCLEAN, VA	2014-04-09	MEDICATION IS FAR TOO EXPENSIVE IN THE UNITED STATES.
thelma wilborn	Plant City, FL	2014-04-09	more medicine for lower cost
alan bean	portlamd, OR	2014-04-09	Cant afford the drug I need so it is either go without or go canada

Deborah Dreyer	Fort Wayne, IN	2014-04-09	I have migraines and can't afford the meds. Insurance only allows me 4 pills a month. I get more than 4 migraines. They have generic in Canada can get 36 for the price of the co-pay of 8 non-generic here.
Lorraine Kunkel	Boise, ID	2014-04-09	It gives me more options when the U.S. doesn't have my medications. Also I can get it at an affordable price.
Donald Ruth	Pagosa Springs,, CO	2014-04-09	I would not be able to afford my heart medicine at USA pharmacies.
James Hollums	Lawrenceville, GA	2014-04-09	My asthma medication is unaffordable unless i can order it from Canadian pharmacies.
VINCENT BOEHNING	Silverthorne, CO	2014-04-09	I can't afford to buy certain prescriptions in the US
Suzi Sauers	Ormond Beach, FL	2014-04-09	I take several prescription\$ daily!
larry kiel	st. louis, MO	2014-04-09	it's important that those with limited finances be able to afford necessary prescribed meds, whether their big pharma drugs, or generics.
Gloria Nelson	Aurora, CO	2014-04-09	The fact that Americans must go to foreign pharmacies to get drugs at a reasonable price is bad enough. To take that ability away from us is unconscionable. Whatever happened to the free market?
Barbara Chertowsky	San Francisco, CA	2014-04-09	I order a migraine medication from a Canadian pharmacy because I can't afford extremely high US prices, even for the generic. My insurance company copay would be more than it costs me to pay for the medication out of pocket. There are millions of Americans like me who would not be able to afford some or all of their medications because of the drug industry's stranglehold on US drug prices.
Angie Pennacchini	West Warwick, RI	2014-04-09	I am on a fixed income. My insurance doesn't cover every drug prescribed, too much economical burden on US Citizens and working class (Students Loans, medications, Dentals, etc.)
Bobby Saye	Gun Barrel City, TX	2014-04-09	When my insurance hits the donut I cannot afford USA retail price
Karla Winkel	Laramie, WY	2014-04-09	I am a voting, educated, low income, tax paying US citizen and have not applied for or received federal assistance. Not only was I previously unable to obtain health insurance in my home state for a pre-existing gastro condition, I was unable to afford the \$8,000/yr RX in the states. Canadian pharmacies charged me 1/4 the cost of this needed medication. Thank you Canada. Please keep the RX border doors open for others in the same boat and be very glad if you fall into a higher tax bracket. Sincerely, K. Winkel
Diana Merritt	Sammamish, WA	2014-04-09	\$\$\$ choices!
James Allen	Cedar Key, FL	2014-04-09	We are getting robbed in the United States ! I can't afford it
ROBERT HOLT	ATLANTA, GA	2014-04-09	THE GOVERNMENT SHOULD NOT HAVE SUCH CONTROL OVER THE PERSONAL LIVES OF ITS CITIZENS. WE NEED MORE FREEDOM - NOT LESS.

Charles Fischer	Rochester, NY	2014-04-10	to expensive drug taken because had stroke will discontinue if can't get cheaper
Toni Altman	North Myrtle Beach, SC	2014-04-10	This is the only way I can afford my medications.
Janice Granum	Atlanta, GA	2014-04-10	As someone about to be on Medicare, I fear that medical and drug costs will make it impossible for me to live independently in a few years. I don't want to be a burden to my children after all the years I worked and paid into the system. There are immigrants who have paid nothing collecting benefits from the people who built this nation. I don't mind helping but allow me to have the same benefits.
Sharon Johnson	Naples, FL	2014-04-10	Because I can't afford the prices in the US
DeDe Dean	Atlanta, GA	2014-04-10	Being in the healthcare industry I see patients who cannot afford the high cost of medicine!!!
Frank Mills	Eloy, AZ	2014-04-10	I can't afford the extremely high cost U.S. Co. charge and would have to go without my meds which over time would be fatal.
